

## Maths

This term we will continue to use our multiplication and division skills and use these to solve simple problems. We will then move on to start our fraction learning and will look at halves and quarters.

We will continue to consolidate our addition and subtraction facts and strategies for addition and subtraction.

# Superheroes

## Term 5

## English

We'll continue to focus on our reading and spelling words; lots of those high frequency and common exception words.

Mr Grumpy's Outing is the book we will be using for our writing stimulus; lots of adjectives and adverbs to write a sequence of sentences to form a narrative.

After our exciting trip to Longleat, we will write a non-chronological report to show our learning about Meerkats.

## PSHE Relationships

**Key question: Who are the people around us who we can trust?**

Jigsaw Jo will help teach us how to identify the different members of our family, understand our relationship with each of them and know why it is important to share and cooperate. We'll also learn that everyone's family is different but we can all do things to make our family a happy one. We'll also look at relationships with our friends and learn how we can help to resolve any conflicts with them - problem solving at its best!

## History

**Key Question: Can you tell me about a hero from the past?**

We're going to save the fictitious superheroes for another time and instead will be looking at real-life superheroes from the 1700s through to the 1900s.

We'll learn about some of the medical superheroes that have enabled and founded many of the everyday practices we take for granted, including the topical practice of vaccination; some of the heroic people that paved the way to abolish slavery and we'll look at the achievements of some inspirational explorers and adventurers - the slogan 'not all superheroes wear capes' was made for our topic!

## RE- Core Concept : Islam

We will be asking the question how do some Muslims show Allah is compassionate and merciful? We will be digging deeper from our previous learning looking further into prayer and Muslim community.

## Art and DT:

**Key Question: Can you create a sculpture using natural resources in the style of Andy Goldsworthy?**

This term we will learn all about the works of Andy Goldsworthy. We will explore sculpture and understand how we can make our own. We will look at what resources we commonly use for sculpture. We will then create our own using natural resources from the world around us.

## Science

**Key Question: What make each material special??**

This term we will revisit our topic of materials. We will recap the how materials can be changed through heat and force. We will then look at the properties of each material.

We will discover what makes each material unique and special and why we would choose a material for each specific job.

To link with our superheroes topic, we will learn about scientists who have discovered new materials, and scientists who have developed incredible uses for specific materials.
